🎨 UI/UX Changes Summary

Modified Components

1. CreateNodeModal Component

File: `MATHESIS-LAB_FRONT/components/CreateNodeModal.tsx`

UI/UX Changes: - ✨ Added node type selector dropdown with 7 options - 🎯 Visual formatting: enum values → user-friendly display (CHAPTER → "Chapter") - 📋 Default selection: CONTENT node type - ✅ Form validation integrated with node type selection - 🔄 Type-safe form submission with NodeType parameter

User Impact: - Users can now explicitly select node type when creating nodes - Better visual organization with dropdown selector - Clear labeling of node categories - Improved workflow clarity

2. Node Model & Service Layer

Files: - `backend/app/models/node.py` - `backend/app/services/node_service.py`

UI/UX Changes: - 🔒 Transaction lock implementation (no visible UI change, improves stability) - 🗑 Soft deletion pattern (enables trash/restore functionality) - 📊 Order index atomic calculation (prevents display ordering issues) - 🔄 Cascading soft delete (maintains data consistency in UI)

User Impact: - Restored data preserved in trash (future UI feature) - No data loss on accidental deletions - Consistent node ordering across concurrent operations - Better data integrity for nested curriculum structures

3. Types Definition

File: `MATHESIS-LAB_FRONT/types.ts`

UI/UX Changes: - Added explicit `NodeType` union type (CHAPTER | SECTION | TOPIC | CONTENT | ASSESSMENT | QUESTION | PROJECT) - Added `deleted_at` field for soft deletion tracking - Type-safe node creation with NodeType requirement

User Impact: - Improved type safety prevents invalid node types - Better IDE autocomplete for node operations - Clear contract between frontend and backend
